

AWS DynamoDB cross region backup

You can backup Your DynamoDB tables by using **AWS Backup** service.

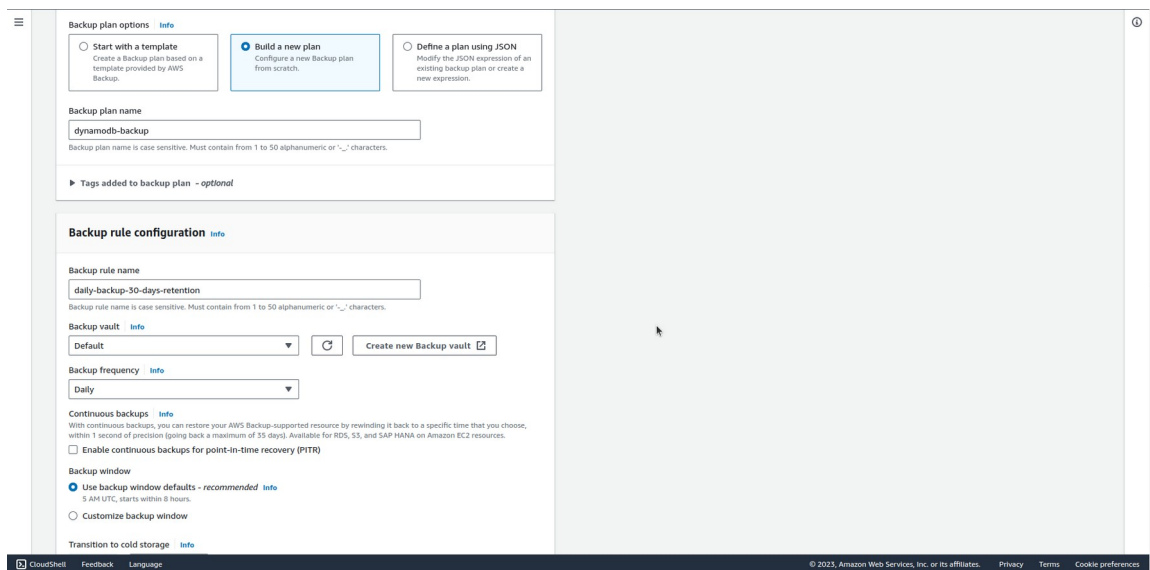

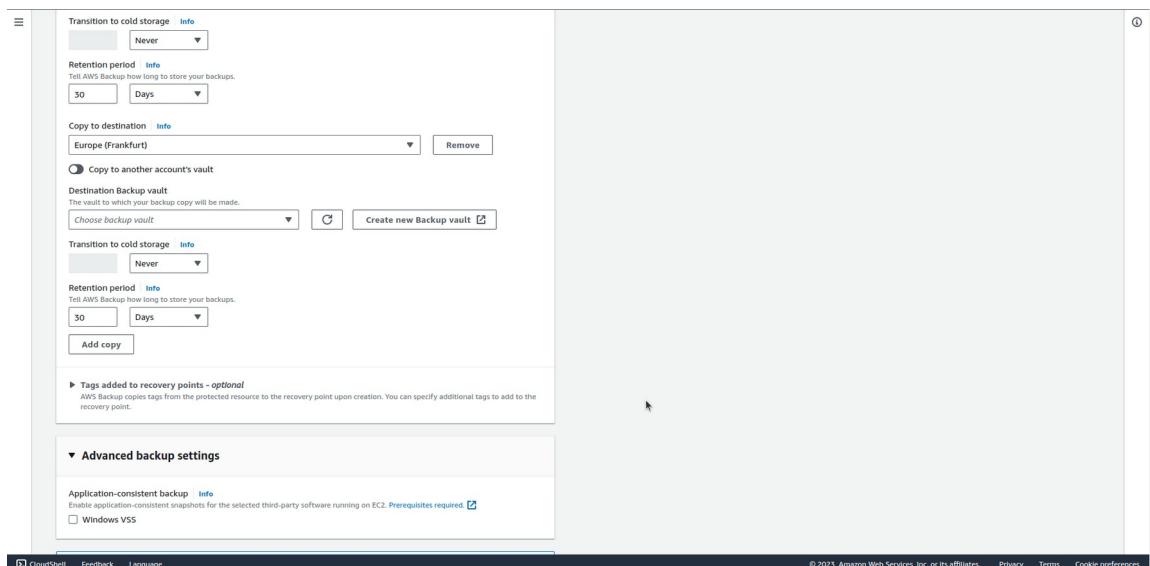

1. Open the [AWS DynamoDB console](#) and go to **Backups** (on the left pane).

2. Click on **Schedule automatic backups** on the **Backups** tab.

3. Give the backup plan a name and set backup rule configuration as You need with **Copy to destination** option set for a different AWS Region.

4. Click on **Create plan** on the bottom of the page.

Pricing

Storage: \$0.11 / GB, 100 GB = \$11 / month

Cross region data transfer: \$0.04 / GB, 100 GB = \$4 / month

Sum: **\$15 / month**
