

How to set up Slack RSS Feed

It's something You would have to do on Your own but I will provide You with a list of recommended security RSS sources and how to add them to specially created Slack channel. So here's the list:

- [AWS Security RSS Feed](#)
- [AWS Security Bulletin RSS Feed](#)
- [Generic Security Related RSS Feed](#)
- [Check the other Amazon RSS Feeds](#)

And [here's the link](#) how to add RSS feeds to Slack.

The Recommendation would be to create a new channel called "Security Feed" or similar. Subscribe to the feeds provided above using Slack.

TL;DR

1. Create new Slack channel called "Security Feed" or similar
2. Visit the [RSS page in the Slack App Directory](#)
3. Click Add to Slack
4. On the next page, click Add RSS integration
5. Next to Feed URL, paste the web address of the feed from the list above
6. Select a channel where feed updates will appear
7. Click Subscribe to this feed to finish
8. To add another feed from the list go to the "Security Feed" channel in Your Slack workspace
9. Click the plus icon next to the message field.
10. Type /feed into the search field at the top of the menu and click on it to add the command to the message field
11. Following /feed in the message field, type subscribe and paste feed address
12. Send the message
